

Hello Drivers & Race Teams,

I'd like to thank you all for your patience with the release of the tentative 2025 Class Rules. I'd like you to pay special attention to the logos on the top of each of the different sets of rules. These are the logos of the tracks that have worked diligently on getting track rules in line with one another. This has been no easy task as many tracks have their own way of interpreting rules for the various classes. We, each participating track, did our collective best to be flexible in order to offer a universal set of rules.

These rules are tentative and there will more than likely be a few tweaks coming our way. On a very positive note, we may see another track or two jumping on board with the universal set of rules. A track is more than welcome to adopt the rules for one or more of the classes. Tracks don't have to adopt the universal rules for every class. Wouldn't it be nice this summer for a driver with a Street Stock to be able to race at 8 or 9 different area tracks, all with the same rules?

Please review the rules and start getting those hot rods ready to roll. The first hot laps are less than 160 days away!
